

DermaTherapy®

BY STANDARD TEXTILE

THE NEXT GENERATION OF HEALTHCARE TEXTILES

DermaTherapy® is the first and only silk-like fabric cleared by the FDA for the prevention of pressure injuries. Silk-like fabric has been recognized and recommended for use in the National Pressure Injury Advisory Panel (NPIAP) Clinical Practice Guidelines.

Increased Wicking Rate

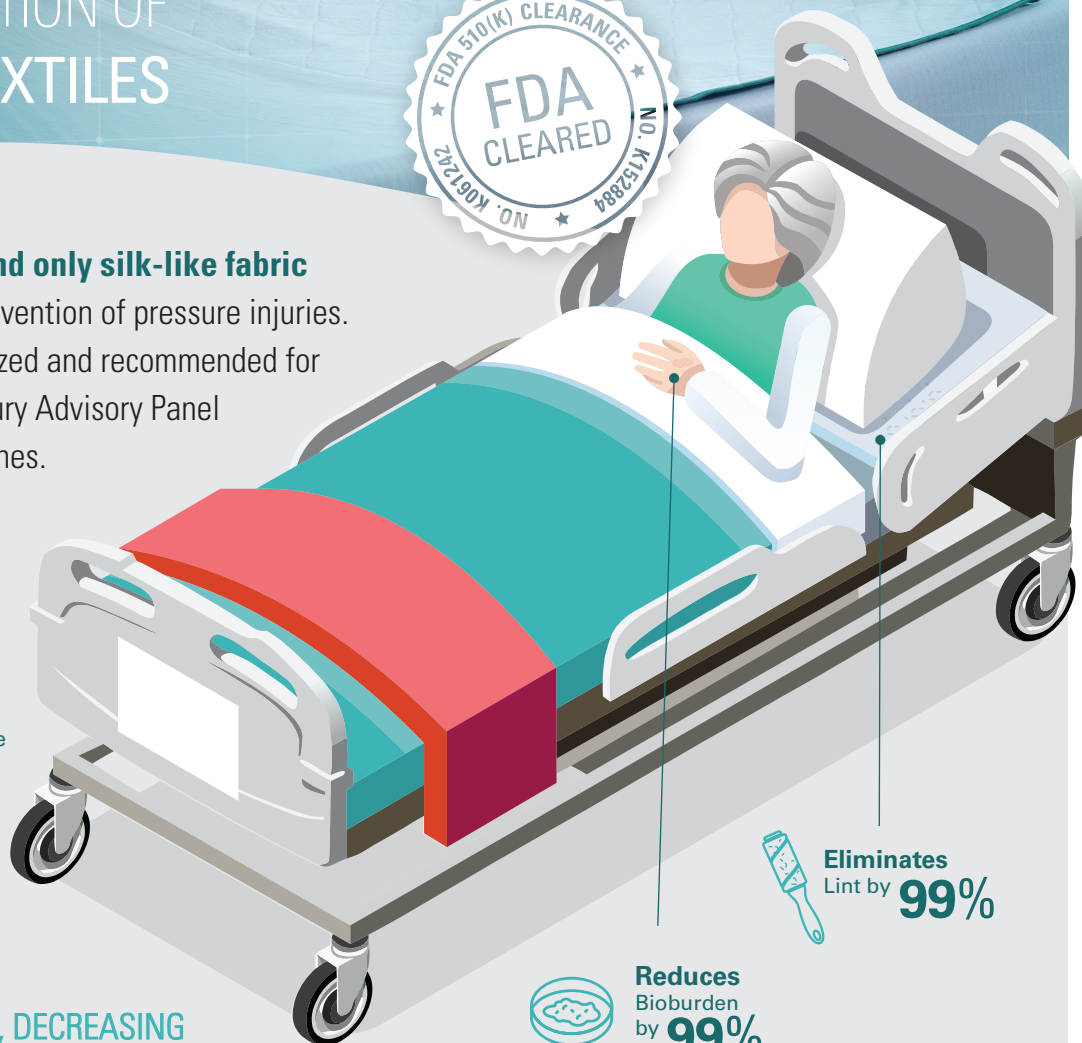

Faster Drying Time

Reduction in Shear and Friction

KEEPS SKIN COOLER, DECREASING Metabolic Demand by 10-15%

Eliminates Lint by 99%

Reduces Bioburden by 99%

HEALTHCARE FACILITIES ARE THE SECOND

highest contributor of environmental waste in the United States, producing more than **6,600 tons of waste each day**, which adds up to over four billion pounds of waste annually.^{1,2}

DermaTherapy® can improve a facility's sustainability efforts by reducing medical waste associated with the use of disposables.
